Dr. Sam Harouni Restores Natural Teeth in Hours Through All-on-4 Dental Surgery

BEVERLY HILLS, CA

September 17, 2019

FOR IMMEDIATE RELEASE

Dr. Sam Harouni, the founder of Sam Harouni DDS, is an oral and maxillofacial surgeon that is passionate about helping patients get back their beautiful, natural smile. Dr. Harouni provides bone grafting surgeries, full mouth restoration surgeries, and TMJ treatments to patients in Beverly Hills, CA and the surrounding areas.

Individuals with a full arch of missing or falling teeth can now get the smile they have always wanted at Sam Harouni DDS dental practice. Dr. Harouni offers All-on-4® full arch dental implants that make the teeth more stable and secure. The implants give patients a healthier and youthful smile, helping them regain their confidence.

With the All-on-Four method, dental surgeons can fit a fixed dental bridge to restore fallen or missing teeth immediately. As can be deduced from the name, only four implants are fixed on every jaw. Generally, patients only require one procedure, which can be performed under twilight or general anesthesia. Any loose teeth that may be in place can be removed during the procedure.

During the All-on-4 procedure, Dr. Harouni uses advanced software to determine the precise location to fit each dental implant. After the surgery, patients can wear temporary denture appliances on the dental implants. The new dentures can be used immediately after they have been attached to the dental implants.

All-on-4® is a full-arch solution that is only offered by elite dentists across the country. Dr. Harouni is excited to offer the solution to patients with missing or falling teeth in Beverly Hills, CA.

“The All-on-4 procedure provides patients with a permanent, long-term solution that looks normal and functions like natural teeth. When patients see their new teeth, they instantly fall in love with them and their confidence increases”, Dr. Harouni says.

What’s more amazing is that the All-on-4 procedure gives patients the perfect teeth they have always wanted on the same day that they undergo the surgery. When patients leave Dr. Harouni’s dental practice, they leave with a new set of fixed, non-removable teeth.

Majority of patients that go for the All-on-4 procedure are those with decayed teeth that are beyond repair, patients with failing bridges or dentures, and those with no teeth. Compared to more traditional techniques, the overall cost of All-on-Four procedure is lower and its aesthetic results are better.

Dr. Harouni has a high success rate with doing All-on-4 procedures. He states, “I recommend the All-on-Four procedure as it is shorter compared to traditional procedures, less painful, and patients walk out of the practice with a new set of permanent teeth on the same day”.
